

6 - 12V

6V 12V 20 ▶ 150 Ah (gel or liquid)

Réf. 024847

- The charge is automatic, without supervision
- The Wattmatic chargers (curve Wu0U) guarantee a 100% charge for each type of lead-acid batteries : a standard "automatic" charger (curve W2 or WU) charges in general the batteries up to 90%.
- Protection of the on board electronics
- Charging without disconnecting the battery for normal charging.
- Protection against the polarity reversals or the battery tension errors.
- No tension in clamps if they are not connected to the battery - avoid short circuit and sparks
- Automatic compensation for sector fluctuations.
