

## An exceptional Starting Power for 12V and 24V batteries

The 2 « high performance » integrated lead batteries, deliver exceptional power, in 12V or 24V. To start a wide range of vehicles up to and including trucks and coaches.

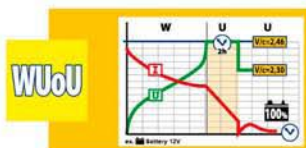

Gyspack Pro 12.24 can achieve more than 28 truck starts (in 12V) or 16 starts (in 24V) before being recharged\*.

## Ideal for on-site intervention

Compact dimensions and wheeled trolley mean excellent Portability.

## Quick recharge, unsupervised

Its powerful automatic integrated battery charger (7A - WUoU charging curve), will recharge Gyspack Pro 12-24's internal batteries to 100% in only 2 hours. Safety features mean recharging can be done totally unsupervised.

Integrated charger 230V = 50/60 Hz  
Charging current:  
7A average / 11A RMS

Ref. **026452**

## Designed for a maximum secured usage

**Gyspack Pro 12.24 features comprehensive protection for on board electronics, the charger and the battery.**

- **Battery switch** :
  - Protection for on-board electronics.
  - Prevention of short circuit and overload.
  - Warning against polarity inversion (with buzzer and lights).
  - No sparks when connecting the clamps to the terminals.
- **20A Fuse** : protects the charger against power supply variations

Gyspack Pro 12.24  
Can be moved without  
Its trolley
