

Réf. 026148

**ENERGY STATION** is a multi-function mobile unit:

- Self contained charger 12 or 24V for cars, vans, trucks and on-site work vehicles.
- Automatic charger 2 x 12 Volts
- Charging can be carried out without supervision:
  - Compatible with 12V or 24V, gel or liquid external batteries from 35 to 225 Ah

### Self contained starter 12V and 24V

→ To fit with one or two batteries (not provided) from 120 to 170 Ah.

→ Starting power : dependent upon the chosen battery capacity.

Energy Station is designed **to start cars, vans up to on-site work vehicles and buses.**

→ **Integrated tester** to check the charge condition of the internal batteries.

### Multi-charges unit 12V or 24V

→ Space saving set of **2 12V chargers** with 3 charging outputs:

- 2 independent outputs: 1 for each trolley batteries
- 1 output for the external batteries (12 or 24V).

→ **Fully and automatically charge without supervision** even highly discharged batteries (Floating system – Wuou curve)

→ **Charge all types of batteries 12V or 24V** with liquid or gel electrolyte from 35 to 225 Ah.

→ **Polarities reversal protections** for the charge of the external batteries.

- To maximize the life of the internal batteries, charge and keep the Energy Station charged after each use
- Trolley delivered in a kit requiring some assembly.
- The Energy Station trolley is equipped with 4 puncture proof wheels, with 2 for steering for excellent mobility.

CE EN 60335-2-29
