

The **QUICK SPOT AIR GUN** is the ideal tool for no effort straightening of steel panel sheets. It combines performance and comfort of use thanks to its light weight and its compact dimensions. Its **progressive trigger** allows a better control of the pulling on the car body.

Simple to use

The **QUICK SPOT AIR GUN** can connect on any dent pulling machine with automatic detection of car body, and equipped with a DINSE 35/50 connector.

A simple contact of the pulling tip on the car body triggers the welding. A **progressive action on the trigger** allows a **progressive pulling** on the car body. Twisting the tip will detach it with no effort.

Consommables (option)

050839 - Pulling electrodes (x5)

Option

052482 - Adapter for gun

QUICK SPOT AIR GUN

Productivity and efficiency

Efficient, the **QUICK SPOT AIR GUN** will save you precious time on all your dent pulling jobs.

Lightweight (920g) and **compact** (L 180 x l 100 x H 175mm), you will appreciate its ergonomics and its comfort of use.

The **QUICK SPOT AIR GUN** is delivered with a 2.5m long set of cables.

Applications : hail impacts, trolley impacts, etc...
