

The **POWERDUCTION 160L** provides immediate and powerful heating to release, or simply heat, steel or aluminium. With 16 kW heating power and liquid cooling, this product is particularly suitable in the context of truck repair.

The ideal tool for mechanical and maintenance work :

- essential to release steering linkage (wheel alignment).
- removal of glow plugs, seized up wipers, spare wheel crates.
- releasing of seized up bolts.
- releasing of steering ball joints without damaging the bellow.
- releasing of shaft drives seized up in the hub.
- removal of automotive or truck exhaust lines.

but also for car body work :

- removal of steel or aluminium elements assembled with glue.
- frame straightening, even for heavy vehicles (if not HSS).
- shaft straightening, tie-beam straightening, rigid axle straightening.

Side member heating
(if not HSS)

Releasing of rusted
bolts

Releasing of steering
linkage

Features

High heating performance : 16 kW; heats up directly in the heart of the metal, at a depth of 6mm. Brings a piece of steel 10x40x6mm to red hot (around 1000°C) in only 1 second.

Safety and time savings :

Immediate heating, without flame, on a specific area, allowing working close to cables, pipes, or any other part sensitive to heat, without dismantling.

Comfortable to use :

4 metre long inductor cable, allowing working at heights.

POWERDUCTION 160L

Ref. 053472

Product delivered complete, already assembled, with 1 round-end inductor provided and cooling liquid provided.
