

This hydro-pneumatic lifting apparatus allows quick and easy access to the lowest parts of a vehicle with minimal effort. It is ideal for all car body work.

The base has 2 wheels at the back for easy movement of the apparatus. Its width ensures stability.

Optional :
Rocker panel lifting tool - ref. 053236

WARNING !

Once the vehicle is lifted, ensure a car jack is put in place in order to secure it.

Helps prevent back, knee and other injuries associated with prolonged work in uncomfortable positions
